

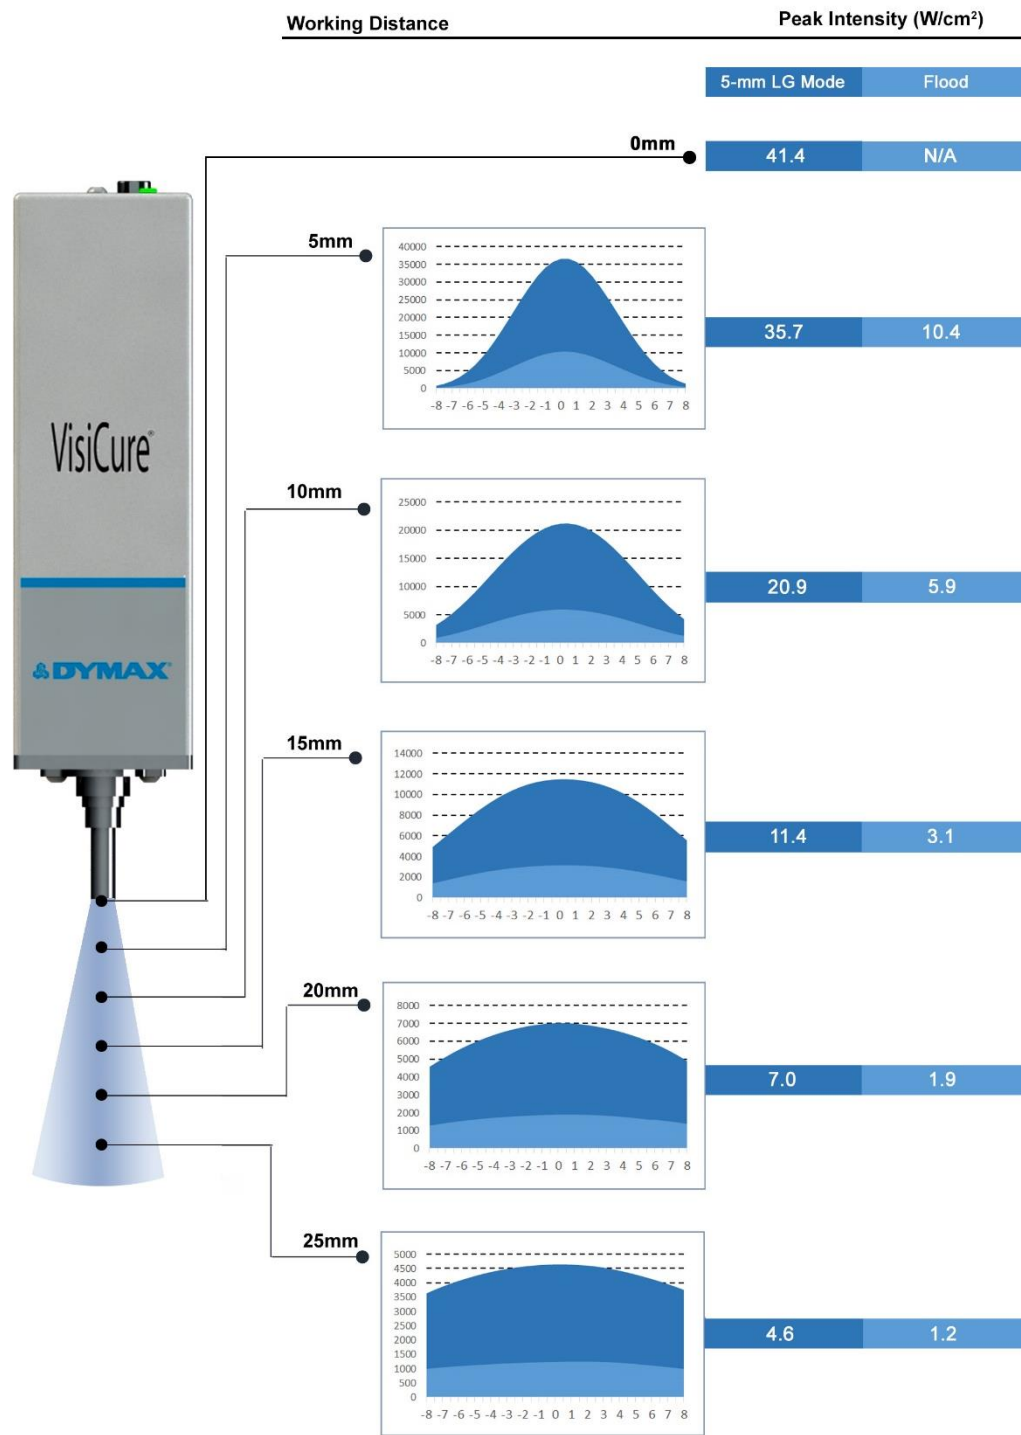

Figure 4. VisiCure®, 405 nm - Intensity at Various Working Distances
Measured with an ACCU-CAL 50-LED in both 5-mm lightguide (LG) and flood source modes*

* Dymax recommends using the 5-mm lightguide source mode on the ACCU-CAL™ 50-LED, when measuring at 0 mm with the provided adapter in the ACCU-CAL kit. If measurements are made at greater working distance, Dymax recommends using the flood mode source for measurements. For convenience, both numbers are provided in this chart.
